Our Story

Established in 2004, Wire-Not Electrical was founded by husband and wife team, Andrew and Sarah Reilly. From humble beginnings, our current team has over 20 staff. Everyone at Wire-Not Electrical is passionate about providing excellent client service, professionalism, and high-quality work. These values continue to provide the solid foundation that has propelled Wire-Not Electrical to the forefront of their industry.

Our business journey has been about making a significant impact with commercial businesses, homeowners, builders, and property managers throughout Brisbane. Our job is not only to solve electrical problems; we build relationships based on trust, expertise, and an unwavering commitment to quality.

Commercial

Wire-Not Electrical will be your responsive electrical partner since we understand how difficult it can be to manage a business. We prioritise the needs of your project with a focus on solutions. We ensure everything is seamless and precise, starting with transparent quoting and continuing with clear, thorough reporting all the way to the final product. enabling you to carry out your greatest work.

Experience and Capabilities

- General lighting and electrical installation, maintenance and repairs
- Car park lighting installation and upgrades
- Emergency light installation, maintenance and testing
- Three phase outlets
- Thermal imaging inspection
- Data cabling and outlets
- Switchboard inspections, installations and upgrades

Residential

At Wire-Not Electrical, we are more than just your typical residential electrician for quick fixes; we work with you to design a safe, secure, and functional house that fits your needs and budget. We make sure you understand what's involved before we start so there are no unknowns. Because we don't like surprises, either.

Experience and Capabilities

- New home wiring - electrical, data, communication, security and air conditioning
